

TTS-ShareInfo™

Shareholder Information and Management System

TTS-ShareInfo™ is a robust and highly functional web-based Shareholder Information and Management System for small to large company shareholder affairs management and for group companies managing multiple company shareholder affairs concurrently.

TTS-ShareInfo™ covers all the key areas of shareholder affairs starting from shareholder servicing and data maintenance, dividend processing and disbursement management, company meeting and election management and much more including web interface, SMS/e-mail communication to the shareholders and document archival management.

TTS-ShareInfo™ covers front-office and back-office automation of shareholder affairs and integrates all the players involved in the management of a company's shareholder affairs—the public company, the shareholder, the depository and the dividend paying bank/s.
